

## Computer Science

Tselmegronan Batzaya

Submitted by Salmaun Masooman

From the start, Tselmegronan (Ronan) was a humble, hard-working, and determined student. He continues to show excellence not only in his academic performance, but in many other ways. Ronan works many hours on SBCC campus to support himself. He is a tutor for CS 104, works as a sub-LTA, and works many hours in the library as well. Even outside of his tutoring/work hours, you will find Ronan helping his peers in the CS lab. Ronan is kind, humble, and a pleasure to work with. This semester, Ronan spent many hours practicing programming problems with his team the "Bug Magnets". The team traveled to UC Riverside for the ICPC competition and came in first place in the 2-year college division! Ronan has taken almost all CS courses we offer at SBCC and has been on the President's Honor Roll every semester.
